

AEROWATCH – RENAISSANCE TOURBILLON

Limited Edition

Watch manufacturer AEROWATCH SA, based in Saignelégier, takes a new step forward by proposing an exceptional 18-carat rose gold timepiece with Tourbillon. With this new watch, the Jura based firm boldly explores new horizons.

To showcase this watchmaking tour de force, AEROWATCH has chosen 18-carat rose gold as the material for the 42.00 mm diameter case. This classic gold case, produced in the workshops of a manufactory in Le Noirmont, features a domed sapphire crystal on the dial side and a transparent flat sapphire crystal on the movement side.

The movement, embellished by “Côtes de Genève” decorations, offers a power reserve of 5 days obtained by means of two barrels. Personalised engraving is available to the future owner of this exquisite timepiece.

The silvered dial, “engine turned” at its centre, displays a circular satin-finished flange with minute-circle and an aperture at 9 o’clock through which can be observed the complete rotation of the regulating organ in one minute.

For an added touch of refined understatement, the hands, like the hour-symbols, are rose coloured to match the case. The genuine alligator watch strap is combined with a personalised 18-carat rose gold pin buckle.

This new creation strengthens the Renaissance collection with a very exclusive limited edition of only 10 pieces.
